Executive Function is one of today’s most critical education topics. Students with strong executive function skills hold the keys to school and social success—from attention and impulse control to time management and organization. This training explores practical and highly effective strategies to enhancing these critical skills. Through understanding brain functioning, teachers will immediately grasp what executive function is and how it affects their students’ learning and behavior.

You’ll learn the explicit, research-based strategies to adapt instruction and classroom structure to enhance students’ executive skills and improve “trouble spots” such as:
- organization
- homework completion
- time management
- note-taking
- study skills
- impulse control
- working memory
- planning skills
- self-regulation
- adaptability

Presented by Kevin Dill
