

Supporting Mental Health Needs in School Settings

October 13, 2017
9:00-3:00

Statistics are reflecting that as many as one in five have a diagnosable mental illness. Join this session to learn about some of the common diagnoses and how they impede performance in classroom settings.

We will not stop here! With each diagnosis discussed, you will learn practical strategies to support students with managing symptoms, improve performance, and reach their goals! Additionally, participants will learn how to equip classrooms to be supportive of students' social and emotional needs from the very start!

Presenter – Elizabeth Avery

Elizabeth Avery is a Licensed Mental Health Counseling Associate that works to implement mental health services in school settings. Elizabeth works with schools to assess mental health needs and develop action plans for how to respond in ways that help students reach their full potential. Additionally, Elizabeth will work with schools to increase faculty resources for responding to a variety of mental health needs including trauma, depression, anxiety, opposition and ADHD through practicing mindfulness, addressing school culture and climate, and developing treatment strategies.
