

Getting the Most Out of 1:1

Schools and educators are finding out that one cannot simply hand a teacher and student a device and expect them to be prepared for a 1:1 learning environment. This takes modeling and immersion for the teachers, just as much as the students. Come learn how to effectively manage a 1:1 environment, increase student engagement with online activities, and incorporate the 4 C's (collaboration, creativity, critical thinking, and communication) into your classroom while using technology. Attendees will have an opportunity to learn about the SAMR Model and how to "tech up" a lesson that they already teach.

Wabash Valley Education Center
