31st Annual Prosthodontics, Dental Implants and Periodontology for General Practitioners

MONTDAY, JULY 27
7:00 - 8:00 Registration, Breakfast and Exhibitions
8:00 - 8:50 Diagnosis and Management of Dental Implant Complications
Carlos Barrero
9:00 - 10:00 Partial Caries Removal: Does it really work?
Carlos Barrero
10:00 – 10:30 Break and Visit Exhibitors
10:30 - 12:30 Management of Periodontal Patients (Perio surgical procedures, lasers, root coverage, soft tissue graft)
Thiago Morelli
12:30 – 2:00 Lunch
2:00 – 3:30 Management of Periodontal Patients for General Practitioners
Thiago Morelli
3:30 – 5:00 Diagnostic and Treatment Planning for Complex Dentition
Carlos Barrero
7:00 - 8:00 Registration, Breakfast and Exhibitions
9:00 – 10:30 Advanced techniques on Removable partial dentures, a solution when nothing else works
Larry Schoenover
10:30 - 12:00 Management of Peri-Implant Soft Tissue Grafts
Carlos Barrero
12:00 – 2:00 Lunch
2:00 – 4:00 The evidenced based approach to periodontology.
Dr. Robert Wright
4:00 – 5:00 Adjunctive surgical procedures, lasers, root coverage, soft tissue graft
Thiago Morelli
5:00 – 6:00 An Evidence Based Approach to Peri-Implantitits
Carlos Barrero
7:00 - 8:00 Registration, Breakfast and Exhibitions
8:00 - 9:00 Dentinal Hypersensitivity; New Remedies to an Old Problem
Carlos Barrero
9:00 – 10:00 Partial Caries Removal: Does it really work?
Carlos Barrero
10:00 – 10:30 Break and Visit Exhibitors
10:30 - 12:30 Management of Periodontal Patients (Perio surgical procedures, lasers, root coverage, soft tissue graft)
Thiago Morelli
12:30 – 2:00 Lunch
2:00 – 3:30 Management of Periodontal Patients for General Practitioners

ACKNOWLEDGEMENT
The UNC School of Dentistry would like to acknowledge Straumann USA for supporting this activity with an unrestricted educational grant.

COURSE OBJECTIVES
At the completion of this activity participants should be able to:

• Review and discuss the contemporary techniques and materials in dental implantology and implant therapy
• Demonstrate the ability to diagnose, develop a treatment plan and predictably treat patients with various prosthetic and aesthetic needs utilizing contemporary dental implant protocols
• Diagnose and manage implant failure

COURSE SPEAKER
Dr. Carlos Barrero
Dr. Ibrahim Duqum
Dr. Glenn Minsley
Dr. Thiago Morelli
Dr. Robert Wright

31st Annual Prosthodontics, Dental Implants and Periodontology for General Practitioners
THE WESTIN HILTON HEAD ISLAND RESORT & SPA
Hilton Head Island, SC
The 31st Annual Prosthodontics, Dental Implants and Periodontology for General Practitioners is a comprehensive program that provides insight on a wide variety of clinical paradigms. New technologies and contemporary techniques to diagnose and manage various clinical problems, such as oral cancer, complete and partial edentulism, dental implant therapy and periodontal disease will be addressed in detail. In addition, contemporary management protocols for the aforementioned clinical scenarios will be discussed, supported by the available clinical evidence and highlighted by multiple clinical case presentations. The latest information on endoscopical surgical and conservative therapies, materials and contemporary techniques to improve patient outcomes will be highlighted. This program is "must see" for those who treat adult patients and who wish learning the most updated evidence-based dental treatment and management of the restorative patient.

Join our guest speakers, Dr. Carlo Ercoli and our longtime friend Dr. Larry Schoonover along with UNC School of Dentistry would like to acknowledge Straumann USA for supporting this conference and Dr. Robert Wright for advancing knowledge in dentistry.

ACKNOWLEDGEMENT

U.N.C. School of Dentistry would like to acknowledge Straussen USA for supporting this activity with an unrestricted educational grant.

PROGRAM

Monday, July 27

8:00 - 10:00 Regulation, BeidCUH and Edentulism Carlos Barrero

10:00 - 10:30 Break and Visit Exhibitors

10:30 - 12:30 Diagnosis and Management of Oral Cancer Glenn Minsley

12:30 – 1:30 Lunch

1:30 – 2:30 Management of Periodontal Patients (Perio surgical procedures, lasers, Periodontal regeneration, local and systemic antibiotics

2:30 - 4:30 Hands on session: Periodontal and Restorative Dentistry Case studies

Tuesday, July 28

8:00 - 10:00 Periodontal Surgery for the Restorative Patient (Patient Crown lengthening, Implant therapy and design)

10:00 - 10:30 Break and Visit Exhibitors

10:30 – 12:30 Diagnosis and Clinical Management of Oral Cancer Glenn Minsley

12:30 – 1:30 Lunch

1:30 – 3:00 Treatment of the Head and Neck Cancer patient Glenn Minsley

3:00 – 3:15 Break and Visit Exhibitors

3:15 – 5:15 Management of Periodontal Patients (Perio surgical procedures, lasers, Periodontal regeneration, local and systemic antibiotics

3:15 – 5:15 Hands on session: Periodontal and Restorative Dentistry Case studies

Wednesday, July 29

8:00 - 10:00 Regeneration of Infused Tissues by Dr. Robert Wright

10:00 - 10:30 Break and Visit Exhibitors

10:30 – 12:30 Diagnosis and Clinical Management of Oral Cancer Glenn Minsley

12:30 – 1:30 Lunch

1:30 – 3:00 Treatment of the Head and Neck Cancer patient Glenn Minsley

3:00 – 3:15 Break and Visit Exhibitors

3:15 – 5:15 Management of Periodontal Patients (Perio surgical procedures, lasers, Periodontal regeneration, local and systemic antibiotics

3:15 – 5:15 Hands on session: Periodontal and Restorative Dentistry Case studies

Thursday, July 30

8:00 - 10:00 Prosthodontic Treatment of the Head and Neck Cancer patient Glenn Minsley

10:00 - 10:30 Break and Visit Exhibitors

10:30 – 12:30 Diagnosis and Clinical Management of Oral Cancer Glenn Minsley

12:30 – 1:30 Lunch

1:30 – 3:00 Treatment of the Head and Neck Cancer patient Glenn Minsley

3:00 – 3:15 Break and Visit Exhibitors

3:15 – 5:15 Management of Periodontal Patients (Perio surgical procedures, lasers, Periodontal regeneration, local and systemic antibiotics

3:15 – 5:15 Hands on session: Periodontal and Restorative Dentistry Case studies

Friday, July 31

8:00 - 10:00 Diagnosis and Management of Dental Implant Complications

10:00 - 10:30 Break and Visit Exhibitors

10:30 – 12:30 Diagnosis and Management of Dental Implant Complications

12:30 – 1:30 Lunch

1:30 – 3:00 Treatment of the Head and Neck Cancer patient Glenn Minsley

3:00 – 3:15 Break and Visit Exhibitors

3:15 – 5:15 Management of Periodontal Patients (Perio surgical procedures, lasers, Periodontal regeneration, local and systemic antibiotics

3:15 – 5:15 Hands on session: Periodontal and Restorative Dentistry Case studies

Saturday, August 1

8:00 - 10:00 Diagnosis and Management of Dental Implant Complications

10:00 - 10:30 Break and Visit Exhibitors

10:30 – 12:30 Diagnosis and Management of Dental Implant Complications

12:30 – 1:30 Lunch

1:30 – 3:00 Treatment of the Head and Neck Cancer patient Glenn Minsley

3:00 – 3:15 Break and Visit Exhibitors

SCHEDULE & JULY 27 – August 1, 2015

COURSE OBJECTIVES

At the completion of this activity the participants should be able to:

• Review and discuss the contemporary techniques and materials used in dental implant and dental implant therapy

• Demonstrate the ability to diagnose and develop a treatment plan and predictably treat patients with various prosthetic and esthetic needs utilizing contemporary dental implant protocols.

• Diagnose and manage implant related complications.

• Recognize the protocol and indications of dental implant in prosthetic dentistry

• Identify and discuss the contemporary diagnosis and management of periodontics.

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Examine and identify prevalence, diagnostic tests and treatment for oral cancer

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Compare and Contrast contemporary trends for treatment of dental caries.

• Identify and discuss the contemporary diagnosis and management of periodontics.

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Examine and identify prevalence, diagnostic tests and treatment for oral cancer

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Compare and Contrast contemporary trends for treatment of dental caries.

• Identify and discuss the contemporary diagnosis and management of periodontics.

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Examine and identify prevalence, diagnostic tests and treatment for oral cancer

• Describe and discuss contemporary approaches for periodontal management for the restorative patient.

• Compare and Contrast contemporary trends for treatment of dental caries.
Dr. Carlos Barrero received his dental degree from the University of El Bosque in Bogota, Colombia. He received his master’s degree from the University of Pennsylvania where he completed the postgraduate training in Prosthodontics (1998) and Master’s Degree in Oral Biology (1999). Dr. Barrero moved to Chapel Hill in 1998 to complete an AGD Fellowship in Prosthodontics at UNC. He received his dental degree from the University of Sao Paulo, Brazil. He later received a DDS degree from the University of Detroit Mercy Dental School. Dr. Barrero has been a full-time faculty of the Department of Prosthodontics for 33 years. During that entire period, he has directed the maxillofacial prosthetics portion of the Graduate School of Prosthodontics. Dr. Barrero has been a diplomate of the American Board of Prosthodontics since 2003. He is an AGD Fellow and an ITI Fellow of the ITI® Foundation. Dr. Barrero has contributed to 35 peer-reviewed publications and has created several educational programs. Dr. Barrero has presented courses on bone grafting for site development. He is presently the Director of Graduate Prosthodontic Programs at UNC. Dr. Barrero is currently an adjunct professor in several dental schools and universities around the world. Dr. Barrero has been an invited professor in 35 universities around the world and has presented courses on osseointegration of implants in irradiated bone. During his entire career, he has directed the maxillofacial prosthetics portion of the Graduate School of Prosthodontics. **Course Code:** 15-PR-001

**Course Title:** Mocking Dental Implant Support: A New Perspective

**Purpose:**

The purpose of the Mocking Dental Implant Support course is to provide an opportunity for continuing dental education professionals to gain an understanding of the new technology of dental implant support, which may include bone grafting techniques, bone grafting materials and bone grafting techniques. The course will consist of a series of lectures, demonstrations, and hands-on sessions. The course will be offered in a comprehensive and practical manner, with the goal of providing a thorough understanding of the new technology of dental implant support.

**General Objectives:**

Upon completion of this course, the participant will:

1. Be able to describe the new technology of dental implant support
2. Be able to identify the various bone grafting techniques
3. Be able to identify the various bone grafting materials
4. Be able to identify the various bone grafting techniques
5. Be able to identify the various bone grafting techniques

**Sponsor:**

The University of North Carolina School of Dentistry

**CDE Provider:**

The University of North Carolina School of Dentistry is a provider of continuing dental education and all courses are subject to approval by the American Dental Association Council on Dental Education and Licensure (ADA/CDE). The University of North Carolina School of Dentistry is approved by the ADA as a provider of continuing dental education. The University of North Carolina School of Dentistry has received approval from the ADA/CDE for this program with a ADA CERP Recognition Number 11/90.

**Fee:**

The fee for this course is $325.00. This fee includes all materials, refreshments, and continental breakfast. The fee does not include transportation or housing. Participants are responsible for their own transportation and housing costs.

**CPEU:**

Up to 4 hours of CPEU credit will be awarded for successful completion of the course. CPEU credits are only allowed for those who attend the entire course.

**Refund Policy:**

A $100.00 late registration fee will be charged for all registrations received after Friday, July 17, 2015. No refunds will be given after July 17, 2015.

**Dates:**

Monday, July 27 – Friday, July 31, 2015

**Location:**

The Westin Hilton Head Island Resort & Spa

**Accommodations:**

The Westin Hilton Head Island Resort & Spa is located on Hilton Head Island, SC. You can reach the hotel at 843-681-3800 or visit www.westin.com. The hotel offers a variety of room options, including standard and executive rooms. The hotel also provides meeting and conference facilities, and offers a variety of dining options.

**Cancellation Policy:**

Any cancellations received after Friday, July 17, 2015 will be subject to a $100.00 cancellation fee. Cancellations received before Friday, July 17, 2015 will be subject to a $75.00 cancellation fee. All cancellations must be made in writing. Cancellations received after Friday, July 17, 2015 will not be eligible for a refund.

**Registration Information:**

To register, please visit the University of North Carolina School of Dentistry’s website at www.dentistry.unc.edu/cde/courses or call 919-537-3400. For more information, please contact CDE at cde@dentistry.unc.edu.
Hands-on Session: Demonstrate and Periodontology for General Practitioners

Dr. Ercoli is a diplomate of the American Board of Prosthodontics and Periodontology and an ITI Fellow for membership in several organizations including the International and European Associations of Dental Research, American Congress of Periodontology, Academy of General Practice, Internationale Gesellschaft fuer Prothetik and American Prosthodontic Society. He is Past President of the American Prosthodontic Society. He participated in several publications and authored several articles on the diagnosis and treatment of certain bone-related clinical scenarios with dental implants. Emphasis was placed on the principles of peri-implantitis, peri-implant mucositis, periodontal disease, bone repair, and bone augmentation techniques. The hands-on component included the diagnosis and treatment of certain bone-related clinical scenarios with dental implants.

Dr. Maddox established a private practice in Summerfield, NC and attended the L.D. Pankey Institute in 1996. In 2003, he moved to Chapel Hill to complete a Fellowship in teaching Prosthodontics at UNC-CH School of Dentistry. Dr. Maddox also completed a Fellowship in craniofacial prosthodontics at Albert Schweitzer Hospital; Evolution Dental Science; Midwest Dental; and 3M-ESPE. He has trained hundreds of dental students and prosthodontics residents during pre-doctoral and post-doctoral training. He currently practices in private practice in Chapel Hill, NC and is the Director of Continuing Dental Education for the UNC School of Dentistry. This hands-on session will focus on the treatment of difficult cases using limited knowledge when incorporating new techniques and technology into clinical practice.

Dr. Schoonover is a diplomate of the American Board of Prosthodontics and Periodontology and is an ITI Fellow for membership in several organizations including the International and European Associations of Dental Research, American Congress of Periodontology, Academy of General Practice, Internationale Gesellschaft fuer Prothetik and American Prosthodontic Society. He is Past President of the American Prosthodontic Society. He participated in several publications and authored several articles on the diagnosis and treatment of certain bone-related clinical scenarios with dental implants. Emphasis was placed on the principles of peri-implantitis, peri-implant mucositis, periodontal disease, bone repair, and bone augmentation techniques. The hands-on component included the diagnosis and treatment of certain bone-related clinical scenarios with dental implants.

Dr. Maddox established a private practice in Summerfield, NC and attended the L.D. Pankey Institute in 1996. In 2003, he moved to Chapel Hill to complete a Fellowship in teaching Prosthodontics at UNC-CH School of Dentistry. Dr. Maddox also completed a Fellowship in craniofacial prosthodontics at Albert Schweitzer Hospital; Evolution Dental Science; Midwest Dental; and 3M-ESPE. He has trained hundreds of dental students and prosthodontics residents during pre-doctoral and post-doctoral training. He currently practices in private practice in Chapel Hill, NC and is the Director of Continuing Dental Education for the UNC School of Dentistry. This hands-on session will focus on the treatment of difficult cases using limited knowledge when incorporating new techniques and technology into clinical practice.

PROGRAM
31st Annual Prosthodontics, Dental Implants and Periodontology for General Practitioners

MIDNIGHT, JULY 27
7:00 – 8:00 Registration, Breakfast and Exhibitions
8:00 – 10:00 Diagnosis and Management of Dental Implant Complications
Dr. Thiago Morelli

TUESDAY, JULY 28
8:00 – 9:00 Dentinal Hypersensitivity: New Remedies to an Old Problem
Carlos Barrero
9:00 – 10:00 Single Tooth Anterior and Posterior Implant Restorations
Carlo Ercoli
10:00 – 10:30 Break and Visit Exhibitors
11:30 – 12:30 Implant Treatment options for the Completely Edentulous Patient, including Problematic Periodontal Patients
Carlo Ercoli
12:30 – 1:30 Management of Periodontal Patients
Dr. Thiago Morelli

WEDNESDAY, JULY 29
8:00 – 10:00 Mini Dental Implants in Restorative Dentistry
Larry Schoonover
10:00 – 10:30 Break and Visit Exhibitors
10:30 – 12:30 Occlusal and Immediate Loading Concepts in Implant Therapy
Carlo Ercoli
12:30 – 1:30 Implant Treatment options for the Partially Edentulous Patient
Carlo Ercoli
1:30 – 2:30 Implant Treatment options for the Completely Edentulous Patient, including Problematic Periodontal Patients
Carlo Ercoli

THURSDAY, JULY 30
8:00 – 10:00 Registration, Breakfast and Exhibitions
8:00 – 9:00 Periodontal Surgery for the Restorative Patient (Patient Crown lengthening, crown and root segment loss, and gingivectomy)
Carlos Barrero
9:00 – 10:00 Partial Dentures: A Practical Daily Tool
Carlos Barrero
10:00 – 10:30 Break and Visit Exhibitors
10:30 – 11:30 Implant Treatment options for the Partially Edentulous Patient
Carlo Ercoli
11:30 – 12:30 Implant Treatment options for the Completely Edentulous Patient, including Problematic Periodontal Patients
Carlo Ercoli
12:30 – 1:30 Mucogingival Considerations in Implant Therapy
Carlos Barrero

FRIDAY, JULY 31
8:00 – 10:00 Registration, Breakfast and Exhibitions
8:00 – 10:00 Extraction or Not: A Critical Evaluation of Civil Liability in Prosthodontics (Lecture based course showing the predictability of prosthetic implant complications vs. surgical therapy)
Thiago Morelli
10:00 – 10:30 Break and Visit Exhibitors
10:30 – 12:30 Diagnosis and Management of Dental Implant Complications
Carlo Ercoli

SATURDAY, AUGUST 1
7:00 – 8:00 Registration, Breakfast and Exhibitions
6:00 – 10:00 Management of Periodontal Patients
Larry Schoonover
10:00 – 10:30 Break and Visit Exhibitors
10:30 – 12:30 Advanced Topics on Removable Partial Dentures, including when nothing else works
Carlos Barrero

This year marks the 31st ANNIVERSARY of the annual UNC prosthodontics program at Hilton Head Island. This program will focus on topics of interest to all practitioners as we continue the long-standing tradition of excellence through an engaging program that promises insight in a wide variety of clinical paradigms. New technology and current techniques to diagnose and manage various clinical problems, such as oral cancer, complex and multidisciplinary care, digital prosthetics, dental maxillofacial and periodontal disease will be addressed in detail. In addition, contemporary management protocols for the aforementioned clinical scenarios will be discussed, supported by the latest clinical evidence and highlighted by multiple clinical case presentations. The latest innovation in endoscopic surgical and intubation techniques, materials and contemporary techniques to improve patient outcomes will be highlighted. This program is “must see” for those who treat adult patients and who wish to learn the most updated, evidence based dental treatment and management of the erosive toothache. In addition to the main scientific program, this is an opportunity for a—Dr. Louis Scaramorce’s drills that can analyze digital imaging, designs and fabrication of all chair side ceramic restorations utilizing CAD/CAM dentistry. This is allowed in the registration form as a separate registration and will be presented in two afternoon sessions.

Join our guest speakers, Dr. Carlo Ercoli and our longtime friend Dr. Larry Schoonover along with UNC Prosthodontics faculty Carlos Barrero, Ibrahim Duqum, Glenn Minsley, and Thiago Morelli.

At the completion of this activity, participants should be able to:
• Review and discuss the contemporary techniques and materials that should be used in the design and implant dentistry.
• Demonstrate the ability to diagnose, develop a treatment plan and predictably treat patients with various prosthetic and orthodontic needs utilizing contemporary fixed implant procedures.
• Describle and discuss contemporary techniques and materials that should be used in the design and implant dentistry.
• Demonstrate the ability to diagnose, develop a treatment plan and predictably treat patients with various prosthetic and orthodontic needs utilizing contemporary fixed implant procedures.
• Describle and discuss contemporary techniques and materials that should be used in the design and implant dentistry.
• Demonstrate the ability to diagnose, develop a treatment plan and predictably treat patients with various prosthetic and orthodontic needs utilizing contemporary fixed implant procedures.
