Digital Approach to Implant Placement & Restoration
April 28 - 29, 2017

UNC SCHOOL OF DENTISTRY
KOURY ORAL HEALTH SCIENCES BUILDING

The UNC Continuing Dental Education program is an ADA CERP Recognized Provider. UNC CDEs term of recognition is May 1, 2015 through June 30, 2019. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credits earned by board of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/cerp

In accordance with the ADA CERP Standard V., everyone involved in planning or presenting this educational course will be required to disclose any relevant financial relationships with commercial interests and this information will be made available to participants at the start of the course. As a continuing education provider, UNC School of Dentistry is responsible for ensuring the content, quality and scientific integrity of all
continuing dental education activities for which credit is provided. The School is also responsible for taking steps to protect against and/or disclose any conflict of interest of the
faculty/instructors presenting these courses.

Cancellations and Refunds
A registration refund, less a $100 fee, will be issued for cancellations received by Friday, April 21, 2017. Cancellations must be received in writing either by fax 919-943-5210 or email at cde@dentistry.unc.edu by Friday, April 21, 2017. This cancellation request must include the name of the course, name of the person registered, name of the person requesting the cancellation, and the reason for the cancellation. No refunds will be issued after April 21, 2017. The UNC School of Dentistry Continuing Dental Education Program cannot be responsible for the refund of any part of the registration fees as a result of emergences,
unforeseen circumstances, or events beyond its control after the cancellation date. The University reserves the right to cancel or postpone any course due to unforeseen circumstances. In the event of cancellation or postponement, the University will fully refund all registrants fees but is not responsible for any related costs or expenses to participants, including cancellations fees assessed by hotels, airlines, rental car or travel agencies.

SPECIAL DIETARY REQUIREMENTS
A registration refund, less a $100 fee, will be issued for cancellations received by Friday, April 21, 2017. Cancellations must be received in writing either by fax 919-943-5210 or email at cde@dentistry.unc.edu by Friday, April 21, 2017. This cancellation request must include the name of the course, name of the person registered, name of the person requesting the cancellation, and the reason for the cancellation. No refunds will be issued after April 21, 2017. The UNC School of Dentistry Continuing Dental Education Program cannot be responsible for the refund of any part of the registration fees as a result of emergences, unforeseen circumstances, or events beyond its control after the cancellation date. The University reserves the right to cancel or postpone any course due to unforeseen circumstances. In the event of cancellation or postponement, the University will fully refund all registrants fees but is not responsible for any related costs or expenses to participants, including cancellations fees assessed by hotels, airlines, rental car or travel agencies.
Course Description

Replacement of missing dentition can be a daunting task for the clinician and patient. Our goal is to deliver the highest level of care to our patients in an efficient manner in a comfortable environment. Improving patient outcomes and clinical outcomes is vastly improved by incorporating digitally assisted implant placement and restoration into your practice. This hands-on course will discuss and demonstrate different techniques in an organized fashion that allows for easy assimilation into your practice. Information will be presented in a step-by-step manner allowing the clinician to confidently navigate through the stages of implant rehabilitation.

1. Diagnosis & Treatment Planning of Implant Rehabilitation
   a. 2D & 3D Imaging
   b. Evaluation of CBCT and Maneuvering of Implant Soft Tissues
   c. Dual Scan Process and Creating Diagnostic Wax-up

2. Evaluation of CBCT and Maneuvering of Implant Soft Tissues

3. Intra-oral Scanning for Implant Restoration
   a. Intra-oral Scanning for Implant Restoration
   b. Digital Scan and Implant Surgery - Step by Step

   a. Guided Implant Surgery - Step by Step
   b. Milling of Abutment/Implant Supported Restoration
   c. Intra-oral Digital Scanning for Abutment/Crown Fabrication

5. Digital Fabricated Implant Restorations
   a. Digital Abutment Solutions
   b. Restoration Design
   c. Materials
   d. Accuracy of Guided Surgery
   e. Guide Classification
   f. Diagnostics - Dual Scan & Digital Merging Process
   g. Digital Fabricated Implant Restorations

6. Digitally Assisted Abutment and Material Selection
   a. Intra-oral Scanning for Abutment/Crown Fabrication
   b. Digital Scan and Implant Surgery - Step by Step
   c. Milling of Abutment/Implant Supported Restoration

7. Digitally Driven Final Restorations
   a. Intra-oral Digital Scanning for Abutment/Crown Fabrication
   b. Digital Scan and Implant Surgery - Step by Step
   c. Milling of Abutment/Implant Supported Restoration

Educational Objectives

At the completion of this course, participants should be able to:

1. Apply an evidenced-based approach to implant diagnosis and treatment planning.
2. Use a dual scan process to merge diagnostic information (x-rays/posterior) to the CBCT.
3. Place removable dentures in implant placement software and obtain a surgical guide to assist in guided implant surgery.
4. Place dental implants using a guided approach.
5. Intra- orally scan implant positions for digitally designed abutment and final restoration fabrication.
6. Digitally design and mill implant restorations on an incremental basis.

Schedule

Dates: February 24, 2017
Time: 8:00 am - 5:00 pm
Location: University of North Carolina at Chapel Hill School of Dentistry

DAY 1 - IMPLANT PLANNING & GUIDED IMPLANT PLACEMENT

8:30 - 9:00 pm Registration & Continental Breakfast
9:00 - 12:00 pm Current Concepts of Guided Implant Surgery
   a. Accuracy of Guided Surgery
   b. Guide Classification
   c. Diagnostics - Dual Scan & Digital Merging Process

10:00 - 10:30 am Break
10:30 - 12:00 pm Hands on

12:00 - 1:00 pm Lunch
1:00 - 5:30 pm CBCT Implant Planning
5:30 - 5:45 pm Hands On
   1. Guided Implant Surgery

DAY 2 - DIGITALLY FABRICATED IMPLANT RESTORATIONS

7:45 - 8:30 am Registration & Continental Breakfast
8:30 - 10:00 am Current Concepts of Digital Assisted Implant Restorations
   a. Material
   b. Restoration Design
   c. Digital Abutment Solutions

10:00 - 10:15 am Break
10:15 - 12:30 pm Hands on
   1. Intra-oral Digital Scanning for Abutment/Crown Fabrication
   2. Milling of Abutment/Implant Supported Restoration
   3. Abutment/Implant Suppressed Restoration Delivery

12:30 - 1:30 pm Lunch
1:30 - 5:30 pm Combining Guided Surgery & Digitally Fabricated Restorations - Immediate Smiles
   a. Immediate Smiles Protocol
   b. Guided Surgery to Final Restoration

Faculty

RYAN COOK, DDS, MS is originally from North Carolina where he received his Doctor of Dental Surgery from the University of North Carolina at Chapel Hill School of Dentistry. Upon completing dental school, he was trained at the University of North Carolina School of Dentistry where he currently serves as an Assistant Professor in the Department of Prosthodontics. Dr. Cook received his General Dentistry certification from the University of North Carolina School of Dentistry and completed his Master of Science in Prosthodontics at the University of North Carolina Chapel Hill School of Dentistry.

INGEBORG J. DE KOK, DDS, MS is an Associate Professor in Prosthodontics at the University of North Carolina, School of Dentistry in Chapel Hill, NC. Dr. De Kok completed her DDS training at Central University of Venezuela in 1997 and received her Prosthodontic Certificate and Master of Science Degree in Oral Biology at UNC in 2002. She completed a fellowship in Implant Dentistry at UNC as well as in 2001. Dr. De Kok has been a faculty member at UNC since 2004. Her major research interests include clinical improvement with the use of dental implants.

Registration and Fees

This course is for dentists only. Registration fee is $1300 on or before Feb 28, 2017 and $1500 after Feb 28, 2017. Space is limited so register early to secure your spot. The registration fee includes course materials, CE credit, parking and all meals listed in the agenda. All registrations must be received by April 21, 2017. UNC CDE recommends that you do not make air travel arrangements prior to receiving a receipt of payment or confirmation. UNC CDE is not responsible for any travel-related costs.

The UNC School of Dentistry designates this course for up to:

15.00 HOURS OF CONTINUING EDUCATION CREDITS
1. Apply an evidenced-based approach to implant diagnosis and treatment planning.

At the completion of this course, participants should be able to:

Educational Objectives

1. Diagnosis & Treatment Planning of Implant Rehabilitation:
   - This hands-on course will discuss and demonstrate different techniques in an organized environment. Improving patient experience and clinical outcomes is vastly improved by incorporating digitally assisted implant placement and restoration into your practice.

2. Evaluation of CBCT and Maneuvering of Implant Softwares:
   - Our goal is to deliver the highest level of care in an efficient manner in a comforting environment. Replacement of missing dentition can be a daunting task for the clinician and patient.

3. Dual Scan Process and Merging Diagnostic Wax-up to digitally assisted implant placement and restoration into practice, improving patient experience.

4. Use a Dual Scan process to merge diagnostic information (i.e., tooth position) to the digitally assisted implant placement and restoration into practice, improving patient experience.

5. Intra-oral Scanning for Implant Restoration:
   - This course provides clinicians with the theory and techniques to implement digitally assisted implant placement and restoration into practice, improving patient experience.

6. Digitally Designed and Milling of Abutment/Implant Supported Restoration:
   - This hands-on course provides clinicians with the theory and techniques to implement digitally assisted implant placement and restoration into practice, improving patient experience.

7. Digitally Driven Final Restorations:
   - This hands-on course provides clinicians with the theory and techniques to implement digitally assisted implant placement and restoration into practice, improving patient experience.

Course Description

Reimbursement of training dentistry can be a daunting task for the clinician and patient. Our goal is to deliver the highest level of care in an efficient manner in a comforting environment. Improving patient experience and clinical outcomes is vastly improved by incorporating digitally assisted implant placement and restoration into your practice.

Digital Approach to Implant Placement & Restoration
April 28 - 29, 2017

The UNC Continuing Dental Education Program is an ADA CERP Recognized Provider. UNC CDS seminars in recognition of the continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Complaints or compliments about a CERP provider may be directed to the provider or to ADA CERP at
www.ada.org/cerp

In accordance with the ADA CERP Standard V, everyone involved in planning or presenting this educational course will be required to disclose any relevant financial relationships and conflicts of interest. The information will be available to participants at the start of the course. As a continuing education provider, UNC School of Dentistry is responsible for ensuring the content, quality, and scientific integrity of all continuing dental education activities for which credit is provided. The School is also responsible for taking steps to ensure the public or any conflict of interest of the faculty/instructors presenting these courses.

Cancellations and Refunds

A registration refund, less a $100 fee, will be issued for cancellations received by Friday, April 21, 2017. Cancellation must be received in writing either by fax (919-966-2310) or email (cde@dentistry.unc.edu) by Friday, April 21, 2017. This cancellation request must include the name of the course, name of the person registered, name of the person requesting the cancelation, and the reason for the cancelation. No refunds will be issued after April 21, 2017. The UNC School of Dentistry Continuing Dental Education Program cannot be responsible for the refund of any part of the registration fees as a result of emergency, unforeseen circumstances, or events beyond its control after the cancellation date.

The University reserves the right to cancel or postpone any course due to unforeseen circumstances. In the event of cancellation or postponement, the University will fully refund registration fees but is not responsible for any related costs or expenses to participants, including cancellation fees assessed by hotels, airlines, rental car or travel agencies.

SPECIAL DENTAL REQUIREMENTS will be handled wherever possible. Please be sure to notify our office in writing of your special need no later than Friday, April 14, 2017. Dental education institutions have an obligation to disseminate new knowledge related to dental practice. In so doing, some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by the University of North Carolina at Chapel Hill does not necessarily imply endorsement of a particular philosophy, procedure, product or by this institution. Course Description

Reinforcement of training dentists can be a daunting task for the clinician and patient. One goal is to deliver the highest level of care in an efficient manner in a comfortable environment. Improving patient outcomes and clinical outcomes is vastly improved by incorporating digitally assisted implant placement and restoration into your practice. This hands on course will discuss and demonstrate different techniques in an organized fashion that allows for easy assimilation into your practice. Information will be presented in a step by step manner allowing the clinician to confidently navigate through the stages of implant rehabilitation.

1. Diagnose & Treatment Planning of Implant Restorations
2. Evaluate and Manage of Missing Implant Sites
3. Dual Scan Process and Merging Diagnostic Data into the CBCT
4. Implant Surgery Protocol and Guided Solutions
5. Intra-oral Scanning for Implant Restoration
6. Digitally Assisted Abutment and Material Selection
7. Digitally Driven Final Restorations

This hands on course provides clinicians with the theory and techniques to implement digitally assisted implant placement and restoration into practice, improving patient experience.

Educational Objectives

At the completion of this course, participants should be able to:
1. Apply an evidenced based approach to implant diagnosis and treatment planning.
2. Use a dual scan process to merge diagnostic information (i.e. position) into the CBCT.
3. Place nonretentive dental implants in implant planning software and obtain a surgical guide to assist in guided implant surgery.
4. Place dental implants using a guided approach.
5. Inter-oral scan implant position for digitally designed abutment and fixed restoration fabrication.
6. Digitally design and mill implant restorative restorations.

Educational Objectives

1. Apply an evidenced based approach to implant diagnosis and treatment planning.
