PART I: DIDACTIC AND HANDS-ON MODEL-BASED TRAINING

COURSE DESCRIPTION

This continuum will enable general practitioners and specialists to integrate basic implantology into your private practice. Training in patient evaluation, surgical placement and implant prosthetics will be provided along with hands-on, model-based training. You will learn step-by-step techniques to allow for safe and predictable implant placement.

COURSE OBJECTIVES

This course will enable you to:

- Learn the biology of osseointegration
- Assess the appropriateness of implants in the partially or fully edentulous patient
- Decide on the appropriate diagnostic radiographs/materials required in treatment planning
- Develop the surgical skills required for placement of implants
- Learn advanced prosthetic treatment planning
- Understand impression making, abutment selection, temporization and final restoration of implants
- Understand proper bone grafting and site development procedures
- Learn how to accomplish esthetic outcomes with implant prosthetics
- Understand wound healing and the effect of systemic diseases and medications on dental implant patients
- Practice socket preservation techniques on maxillary mandibular typodonts.

COURSE OBJECTIVES

Predictable implant placement.
