Digital Technology in Full Mouth Rehabilitation (and working with a digital lab)

Dr. Gary Kaye

Private Practice and founder NYCCD

COURSE DESCRIPTION

An overview of the digital restorative workflow from the perspective of a practicing dentist. The course will discuss how the different digital technologies are used to attain predictable functional and esthetic results in everyday clinical practice. The benefits as well as the limitations of the current technology will be discussed as well as a look into where the technology is headed and how it will affect treatment outcomes.

LEARNING OBJECTIVES

- Understand the digital restorative workflow in clinical practice
- How the digital workflow differs from traditional methods
- The different modalities of digital dentistry- chairside fabrication vs lab fabricated
- Success factors in adopting a digital workflow
- Understand how the different Intraoral scanners are used
- Case management and planning when using digital technology in full mouth rehabilitation
- Understand where the technology is headed

BIOGRAPHY

A graduate of Columbia University, Dr. Gary Kaye is the founder of Kaye Dentistry PLLC, a world-class reconstructive, cosmetic, and implant dental practice located in Midtown Manhattan. He is also the founder and director of the New York Center for Digital Dentistry, which provides consulting, as well as in-person and online digital dentistry learning programs. Clients include other dentists and dental equipment manufacturers.

Dr. Kaye lectures on ceramics, occlusion, and digital dentistry, and performs live patient demonstrations for dentist audiences. He is also on the guest faculty of Henry Schein's E4D University in Dallas, Texas.

He has pursued more than 1000 hours of postgraduate studies in many of the sub-specialty areas of general dentistry and is a graduate of the prestigious Dawson Center for Advanced Dental Training. He was one of the first general dentists in the United States to become certified in Invisalign® and has attained both basic and advanced certification. He has performed leading-edge, computer-assisted restorations technology in his office since 2002. In 2006, he received the Fellowship award from the Academy of General Dentistry.

Born in Randfontein, South Africa, Dr. Kaye is married with two children. He is a passionate supporter of the Open Wide Foundation, whose mission is to change the state of oral health in impoverished communities and build new clinics in conjunction with local government support and investment. In 2012, Dr. Kaye and his family served in the Peronia, Guatemala clinic.
