ESSENTIAL SURGERIES
TO GROW YOUR DENTAL PRACTICE
Columbia University Irving Medical Center, New York City
Sunday Mornings – 9:30 a.m. -12:30 p.m. (3 CE hours per session)
Course Director: Philip Y. Kang, DDS
Program Director, Postgraduate Periodontics

COURSE DESCRIPTION
Designed to accommodate your busy dental practice schedule, this Sunday morning CE course consists of seven sessions which can be taken separately or as a whole. Through a series of concise lectures that get to the core of the technical aspect of each procedure, and includes a strong emphasis on hands-on training of various methods, learn surgical procedures that can be incorporated immediately into your general or specialty practice.

Select from one or more classes:
1. Atraumatic Extraction and Socket/Ridge Preservation – Oct. 14, 2018 (9:30am-1pm, 3 ½ CE)
2. Implant Surgery for the General Practitioner – Nov. 4, 2018 (9:30am-1pm, 3 ½ CE)
3. Crestal-approach Sinus Grafting* – Feb. 10, 2019 (1pm-4pm, 3 CE)
4. Lateral-window Sinus Grafting – Feb. 10, 2019 (9:30am-12:30pm, 3 CE)
5. Treatment of Peri-implantitis – March 10, 2019
7. Implant Surgery for Anterior Teeth – May 5, 2019

*Rescheduled from Jan. 20 due to weather.

Tuition: $255 hands-on, model-based training sessions; $195 lecture only sessions
Every third class taken qualifies for a series discount.
CDM Faculty/Staff enjoy 50% on course fees.

BIOGRAPHY
Dr. Philip Kang is a diplomate of the American Board of Periodontology. Currently, he is serving as program director of Postgraduate Periodontics at Columbia University College of Dental Medicine. Prior to Columbia, Dr. Kang held a faculty position at the University of Pennsylvania as clinical assistant professor in the Department of Periodontics. He received his dental degree at the University of Michigan and then certificates in AEGD and in Periodontics at Harvard University and the University of Pennsylvania, respectively.

Dr. Kang is an adviser to numerous dental implant manufacturers. He has been lecturing on implant-related topics as well as traditional periodontal therapy to general dentists and specialists nationally and internationally. He is involved in multiple clinical research trials evaluating immediate placement, immediate provisionalization and loading, surgical protocols, designs of dental implants, and management of complications.

ESSENTIAL SURGERIES TO GROW YOUR DENTAL PRACTICE
Sundays – 9:30 a.m. – 12:30 p.m. (3 CE hours per session)

CLASSES / LEARNING OBJECTIVES

1. **Atraumatic Extraction and Socket/Ridge Preservation** - October 14, 2018
   - Technique of minimally invasive extractions
   - Proper instruments
   - Bone and socket wound healing
   - Selection of bone grafts and/or membrane
   - Suturing principles
   - Management of complications
   - Insurance coding and billing
   *Includes hands-on, model-based training.*
   *Sponsored in part with material support from: Geistlich and Zimmer Biomet*

2. **Implant Surgery for the General Practitioner** - November 4, 2018
   - Easy-case selection criteria
   - Treatment planning sequence
   - Informed consent process
   - Surgical armamentaria
   - Incision and flap design
   - Drilling sequence review
   - Healing abutment selection
   - Post-operative management
   - Insurance coding and billing
   *Includes hands-on training on plastic models*
   *Sponsored in part with material support from: Dentium and Salvin Dental*

3. **Crestal-approach Sinus Grafting** - February 10*, 2019
   - Case selection guidelines
   - Review of currently available tools
   - Osteotomy preparation
   - Techniques for lifting the Schneidarian membrane
   - Bone graft selection criteria
   - Post-operative complication management
   - Insurance coding and billing
   *Includes hands-on training on plastic models*
   *Sponsored in part with material support from: Dentium*

4. **Lateral-window Sinus Grafting** - February 10, 2019
   - Case selection guidelines
   - Lateral-window osteotomy preparation with various tools
   - Techniques for lifting the Schneiderian membrane
   - Management of Schneiderian membrane perforation
   - Bone graft and membrane selection criteria
   - Pre- and post-operative medication guidelines
   - Insurance coding and billing
   *Includes hands-on training on plastic models*
   *Sponsored in part with material support from: Dentium*

www.dental.columbia.edu/ce  T: 212.305-7124  E: dentalce@columbia.edu
5. **Treatment of Peri-implantitis** - March 10, 2019
   - Diagnosis of peri-implant mucositis vs. peri-implantitis
   - Review of currently proposed treatment modalities
   - Timing of intervention
   - Non-surgical debridement vs. open flap debridement
   - Decontamination methods utilizing various instruments and chemical agents
   - Guided bone regeneration guideline
   - Explanation tools and techniques
   - Insurance coding and billing
   *Lecture course*

6. **Crown Lengthening Surgery** - March 31, 2019 *(originally April 14)*
   - Functional vs. esthetic crown lengthening
   - Indications and contraindications
   - Basic principles of biologic width and ferrule effect
   - Incision and flap designs
   - Osseous re-contouring technique
   - Suturing technique
   - Insurance coding and billing
   *Lecture course*

7. **Implant Surgery for Anterior Teeth** - May 5, 2019
   - Clinical and radiographic evaluation
   - Incision and flap design
   - Minimally invasive osteotomy preparation
   - Simultaneous bone grafting
   - Selection of bone grafts and membrane
   - Suturing technique
   *Includes hands-on training on plastic models*

**COURSE FEES, per session:**

*Select from one or more classes.*

Every third class taken qualifies for a series discount.

$255 hands-on, model-based training sessions; $195 lecture only sessions

Standard CDM Alumni, CDM Faculty/Staff discounts apply.
